Online Classes

Futurekids Online Curriculum provides a wide range of enrichment and professional development opportunities for educators and their students.

Built on the foundation of more than twenty years of domestic and international experience in training and teaching both adults and students, the Futurekids Online technology courses are dynamic, interactive and user-friendly. All courses provide hands-on practice, a wide range of valuable resources and support and real world applications. Course content builds basic educational technology skills, provides concrete examples, samples and techniques for integrating education technology into the classroom and correlates to ISTE NETS (International Society of Technology Education - National Education Technology Standards) as well as local and state standards.

The unique scope of Futurekids online curriculum addresses each student's individual needs and ensures that the technology available can be fully and efficiently utilized. The Futurekids Online Course offerings provide individuals as well as building and district leaders with a cutting-edge and cost-effective way to develop a strong technology program and train leaders.
